P2 Latency threshold breach in Portugal

Active

Median latency has exceeded Portugal's configured country threshold.

Detected 18 min ago | Duration 18 min | Updated 4 min ago | Incident ID QOS-2026-0042

Impact

Potentially affected travellers	Active travellers in Portugal	Estimated impact	Affected monitored devices
860	5,420	15.9%	380 of 1,240

Business impact

Estimated from historical support and refund patterns

Forecasted	Forecasted	Observed	Observed
Expected support contact	Expected refund exposure	Support contact since detection	Refund request
120-160	€ 3200 - 4100	84 - 32% above baseline	18 - €1.240

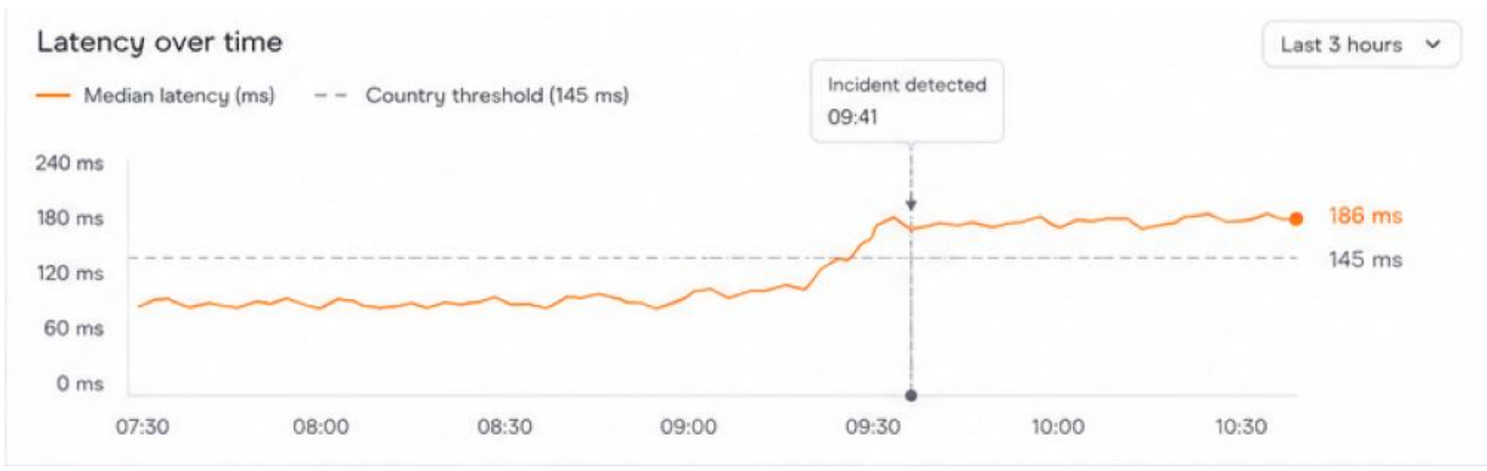

Recommended action

Escalate to Partner A. Approximately 860 travellers are affected, with an estimated exposure of 120–160 support contacts if the incident continues.

What triggered this incident

Current median latency	Country threshold	Above threshold	Confidence
186 ms	145 ms	+41 ms	1,840 historical OpenSignal measurements

Affected scope

Destination	Portugal
Network Operator	Partner A
Cellular technology	4G
Geographic Scope	Country-wide
Data Source	nSpire
Threshold source	OpenSignal

Partner/technology	Median Latency	Status
Partner A / 4G	186ms	Degraded
Partner B / 5G	82ms	Healthy
Partner C / 4G	71ms	Healthy

Incident History

09:41	09:45	10:00	10:00
Incident detected	**Slack alert sent**	**Incident remains active**	**Recovery validation pending**
Median latency exceeded the 145 thresholds	Notification sent to #qos-alerts channel.	Latency continues to exceed the threshold.	Resolution becomes available after recovery is confirmed.
